

Manhattan Associates Announces Editions™ for its Industry-Leading Solutions, Making Them Accessible at Every Stage of Growth

September 22, 2026 12:00 PM EDT

New offering gives commercial and growing enterprises the right-sized path to start their journey with Manhattan, and scale on the same platform as their business grows

READING, England--(BUSINESS WIRE)--Sep. 22, 2026--

[Manhattan Associates](#) (NASDAQ: MANH), the global leader in supply chain commerce with unmatched AI capabilities, today announced the commercial launch of [Editions](#) for Manhattan Active® solutions. Editions provide a new way for companies of all sizes and across industries to partner with Manhattan. They are designed to help growing organizations make a durable, long-term technology decision from the start. As complexity increases, customers can unlock additional capabilities on the same platform, rather than starting over.

Built for [ActiveWarehouse™](#), [ActiveTransportation™](#), [ActiveStore™](#) and [ActiveOrder™](#), on Manhattan's award-winning [ActivePlatform™](#), there are three Editions available: Essentials, Enterprise and Enterprise Premier. Regardless of the Edition selected for each solution, companies gain access to the power of a unified platform, AI capabilities and continuous innovation that underpin some of the world's most complex supply chain and commerce operations. Editions are not separate or simplified products. They are a new way to access the capabilities companies need at the stage they're currently in, with the expertise they need to scale, compete and grow over time.

"One of the most important decisions a growing organization can make is choosing the right technology partner for Commerce and Supply Chain. Each step of their growth journey requires operational excellence in selling and fulfillment, given the direct impact they have on customer experience," said Brian Kinsella, Chief Product Officer at Manhattan Associates. "Editions changes that equation. Businesses can start with Essentials and move to Enterprise or Enterprise Premier as their needs evolve, without migrating to a new system, reimplementing processes or retraining teams. Now, they simply unlock more of the same platform, gaining the capability they need when they need it, without disruption. Editions are a path to scale that protects the value of every technology decision along the way."

With Editions, organizations of all sizes can:

- Access capabilities that matter most now, starting with Essentials, without taking on enterprise-scale infrastructure or IT overhead.
- Move from strategy to value faster through AI-assisted configuration, deployment automation and guided configuration wizards.
- Build on a cloud-native platform with zero infrastructure to manage and get continuous delivery and quarterly innovation delivered automatically.
- Grow into additional capabilities by moving from Essentials to Enterprise to Enterprise Premier without re-implementation, retraining, data migration or operational disruption.
- Truly unify operations by combining different Editions as needed or adding solution families over time on a unified platform as business needs evolve.
